ARCHEA FUND - GLOBIQ, class B1 (LU1132725034) a sub-fund of ARCHEA FUND

Management Company: Bellatrix Asset Management S.A.

Objectives and investment policy

Objectives

The objective is to offer investors a diversified portfolio from amongst the various financial asset classes. The fund is managed flexibly and the composition is not fixed in these classes. The allocation between the asset classes is based on a level of risk which the manager considers appropriate in accordance with his own model.

Investment policy

The sub-fund is invested, without geographic, sectoral or monetary restrictions, in equities, bonds, floating rate bonds, investment funds and instruments linked to the performance of precious metals and commodities. The securities are selected on the basis of their valuation and market conditions. The portfolio is managed on a discretionary basis without using a reference

benchmark.

The currency of the share class is expressed in EUR.

The investor has the right to redeem his shares on demand. The dealing in shares is carried out on each complete bank business day in Luxembourg. The attention of the investor is drawn to the fact that in exceptional circumstances, the possibility for the investor to request the redemption of his shares may be limited or suspended.

These shares are capitalisation shares. Income and capital gains are reinvested.

Recommendation

This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Risk and reward profile

Which materially relevant risks are not adequately captured by the synthetic indicator?

- The investment in debt instruments bears a credit risk insofar as the issuer may refuse or be in a position where it is not able to reimburse all or part of the interests or even of the principal due on the debt instruments. This may result in significant or even total losses of the value of the investments in these debt instruments.
- The investment in underlying funds implies that the sub-fund is exposed to 1) the investment risks borne by the underlying funds, 2) the risk of increases in the level of charges borne by the underlying funds and 3) the risk that the underlying funds limit or suspend the right for their investors to redeem.
- The investment in emerging markets exposes the sub-fund to risks related to political, regulatory, financial or fiscal instabilities or uncertainties that may negatively affect the value of the investments or even question the ownership title of the sub-fund.

What does this synthetic indicator mean?

- The shares of class B1 are classified in category 4 because the value of the share may be subject to medium variations and consequently the risk of loss and the opportunity of gain may be moderate.
- The risk category has been determined on the basis of historical and simulated data and may not be a reliable indication of the future risk profile. The risk and reward category shown does not necessarily remain unchanged and the categorisation of the fund may shift over time.
- The lowest category does not mean a risk-free investment.
- Repayment of the initial investment is not guaranteed.
